

Project Write-up (Placeholder)

Rooftop Solar Yield Model

This is a placeholder PDF used to demonstrate the in-browser preview feature on the Projects section of this site.

To use a real project write-up, export your document as a PDF and upload it to `assets/projects/`, then point the matching entry in `data/projects.json` at the new filename using the "file" field.

Clicking a project card with type "pdf" opens this exact preview window, so visitors can read the document without leaving the page or downloading anything.
